

## Components

### GCM

#### Copper Mesh

#### Features

- ⊙ *GCM is used in conjunction with medium and high voltage ground braids to provide shield continuity when splicing shielded power cables.*
- ⊙ *It works with GCFS to ensure the correct screen connection across the joint area and make*
- ⊙ *electrical contact with the outer screen of the joint.*

#### Dimensions

Part. No	Diameter of wire/mm	Width of Mesh/mm	Length/mm
GCM-50	0.13	50	5000
GCM-60	0.13	60	5000
GCM-70	0.13	70	5000

Special width and length are available up on request. The mesh should be applied with a slight tensile force, with half overlap. Both ends need to be fixed with GCFS.

#### Ordering information

Color	Standard	Silver
Ordering description	Specify product type and length (for example, GCM-60-1000mm)	

\* Other length are available on request.
